

2026 retail price list & cultural guide

RETAIL CUSTOMERS - We recommend coming to one of our public sale days when no minimums apply and we are staffed with people to answer questions. Alternatively, retail customers can place orders after our last public sale day in the spring (May 23).

Orders can be picked up at a prearranged time as long as they meet the following requirements:

\$400 minimum order before tax.

Orders for 38 cell trays, quarts (12 count tray), and 2.5" pots (32 count tray) need to be placed in full flats of single species.

2" pots are only available during our public sale days. During public sale days 2" pots, 2.5" pots, and quarts can be purchased individually.

A 25% deposit is required to confirm an order.

Please send us your wish list by email using the form on our website. Please include the approximate date you want to pick up the order.

This is NOT an inventory. This is just a price list. Availability changes daily. Prices subject to change without notice.

wildflowers

SCIENTIFIC	COMMON	POT SIZE / PRICE				FLOWERS		SUN			SIZE	MOISTURE		NOTES	
		38 cell tray	2" pot	2.5" pot	quart	color	time	full	part	shade	height	dry	avg		wet

key to letter codes

AS = **acidic soils** required

B = provides seed, fruit or nectar for **birds**

BI = **biennial**

CM = **consistent moisture** means that the soil should never dry out completely

D = **dioecious**

EF = **edible fruit**

EW = **emergent wetland** plant

FC = **fall color**

GC = **groundcover**

LB = **long bloom** period

LH = **larval host** for butterflies (see our list of larval host plants)

N = plant that provides **nectar** for butterflies and bees

NC = the plants are **not competitive** when combined with other plants - easily out-competed without regular disturbance or thinning of other plants

nearly native = not native to Michigan but found in adjoining states

not a MI genotype = seed not of Michigan origin

O = **opportunistic** native plants colonize aggressively without competition. We reserve the term invasive for non-native species that uncouple the ecological process of the ecosystems they invade.

PP = these plants attract **pollinators** and/or **predatory** (beneficial) insects. (see nativeplants.msu.edu)

RR = **readily re-seeds**

S = spreads by underground **suckers**

TH = **thorny**

V = **vine**

WD = need **well drained** soils
